March 28th 2016: Understanding Thyroid Disease and Its Impact on Postpartum Health

In the U.S., approximately 20 million people have thyroid disease. The majority of affected people are women. No treatment, or too little treatment, can lead to serious health problems, including fatigue, infertility constipation, dry skin, thinning hair, depression or mood swings, joint pain and stiffness, and more. For new mothers, it can lead to breastfeeding problems. Wonder if your thyroid is causing you problems? Wonder what you can do? Join Marie as she talks with special guest Dr. Jolene Brighten, naturopathic doctor and author of "Healing Your Body Naturally After Childbirth: The New
