Go Green Radio Friday at 9 AM Pacific

**May 20th 2016:Encore: Zika Virus Update: Mosquito-borne
Illness Present in the U.S.**

Zika virus, a pathogen transmitted by mosquitoes, has seemingly established itself in South America and the Caribbean and is now threatening the U.S. Cases have been reported in Florida, Illinois, Texas and Hawaii in patients having traveled to Central and South America, where they acquired the virus through mosquito bites. Our guest today, Joseph Conlon, technical advisor for the American Mosquito Control Association, will discuss how the virus could spread and what we can do to minimize our risks. We'll also discuss what effect, if any, climate change has on mosquito-borne illnesses.
