August 19th 2016: All-Electric America: A Climate Solution and the Hopeful Future

The modern day Edisons have done their job. We need not wait any longer. We are poised to wake up to a world running completely on renewable energy. Waiting any longer is like saying we shouldn't have used the personal computer in 1985 until the smartphone was invented. In their new book, "All-Electric America," authors S. DAVID FREEMAN, former utility CEO, and LEAH Y PARKS, a journalist in the electricity industry, explain how making the transition to an all-electric, all renewable society by the year 2050 is necessary, practical, and achievable. An energy infrastructure powered by the sun
