Go Green Radio Friday at 9 AM Pacific

November 04th 2016:Encore: All-Electric America: A Climate Solution and the Hopeful Future

The modern day Edisons have done their job. We need not wait any longer. We are poised to wake up to a world running completely on renewable energy. Waiting any longer is like saying we shouldn't have used the personal computer in 1985 until the smartphone was invented. In their new book, "All-Electric America," authors S. DAVID FREEMAN, former utility CEO, and LEAH Y PARKS, a journalist in the electricity industry, explain how making the transition to an all-electric, all renewable society by the year 2050 is necessary, practical, and achievable. An energy infrastructure powered by the sun

Featured Guest

Leah Y Parks

Leah Y. Parks is a writer and associate editor for [electricitypolicy.com](#) and *Electricity Daily*, a journal that examines current events and the state of the industry for utility executives, commissioners, regulators and other experts in the field. She has carried out extensive research in the field, has acted as an advisor for technology reports, and has written extensively about innovations in energy storage, smart grid technology, and renewable energy. Ms. Parks holds a Masters of Science degree from Stanford University in Civil and Environmental engineering and a BA from the University of Wisconsin in International Relations. She completed an internship at the United Nations and as a
