The Optimal Health Hour
Tuesday at 2 PM Pacific
November 15th 2016: Don't Let Breast Cancer Steal Second Base

This week's episode will focus on the revolution in early breast cancer detection with thermal imaging technology. Thermal imaging can detect the earliest signs of breast cancer many years before a traditional mammogram can. We will talk with an expert in the field of thermal imaging used to detect breast cancer and discuss how to prevent breast cancer. Don't miss out and be with us for the next Optimal Health Hour episode.

Featured Guest

Catherine Johnson, Owner & Founder of Silk Thermal Imaging

Catherine Johnson is a speaker, Certified Clinical Thermographer, and the owner of Silk Thermal Imaging. Catherine spent 18 years in biotech research before launching her thermal imaging practice. In 2009 she devoted herself doing research in the breast cancer industry. In spite of spending the prior 18 years in research, during her research in 2009 she learned a lot that she did not previously know, and if she didn't know it, that meant most women didn't know it either. In July of 2009 she compiled all of her research, put together a presentation and launched Silk Thermal Imaging. Today she continues to educate men and women on prevention of disease rather than detection.
