Occupy Health: *What's Real and what is not* with Susan Downs, MD

Occupy Health
Friday at 11 AM Pacific
February 10th 2017: Aging is a Mistake

Raymond Francis believes that aging is a mistake and with proper maintenance we can live to age one hundred. Fatigue, obesity, aches and pain are not a normal result of aging, but result from not allowing the body to perform its normal function of self repair. If we don't maintain our body, it will end up on a junk pile in disrepair. There are teenagers that have the biological age of forty due to unhealthy life styles choices. He further states that there is only one disease that is caused by either lack of nutrition of toxins. He, like past speakers, believes that disease can be pr

Featured Guest

Raymond Francis, MSc

Raymond Francis has been cited as "one of the few scientists who has achieved a breakthrough understanding of health and disease." A graduate of MIT, he is the author of five cutting-edge books on health, including the international bestseller Never Be Sick Again and The Great American Health Hoax, Never Fear Cancer Again, Never Feel Old Again, and Never Be Fat Again.
