With over 70% of the earth's surface covered in water, much of the world is inaccessible to archaeologists employing traditional, land-based archaeological techniques. Employing new procedures and methodologies, the father of underwater archaeology, Dr. George Bass, revolutionized the field in the 1960's by demonstrating that rigorous scientific analysis could be conducted under water. Journey into the fascinating and unique world of underwater and nautical archaeology with our very special guest, Dr. James P. Delgado, one of the foremost experts in the field of underwater archaeology. Through
