**June 30th 2017: From the Ashes - A NatGeo Documentary on the Future of Coal in America**

From National Geographic Documentary Films, From the Ashes captures Americans in communities across the country as they wrestle with the legacy of the coal industry and what its future should be under the Trump Administration. From Appalachia to the West's Powder River Basin, the film goes beyond the rhetoric of the "war on coal" to present compelling and often heartbreaking stories about what's at stake for our economy, health, and climate. The film invites audiences to learn more about an industry on the edge and what it means for their lives.
